Over the past few years, I have been working on a complex foreign project aimed at automating business processes. I was a frontend developer in a team that included one backend developer and a designer who created the website layout. I was responsible for developing and maintaining the user interface. We used technologies such as HTML, SCSS, JS, Webpack, and SVG sprite. We successfully completed the project thanks to clear communication and team cohesion. My goal is to develop in the direction of frontend development and strengthen my skills in the technologies used in this field.

PROFESSIONAL EXPERIENCE

Website of the ToDoIt Service [Freelance], *Live Demo* [↗](#)

February 2023

We created a user-friendly interface with animation, and a fast website response, not overloaded with residual technologies.

Ukraine

Tech skill: html / scss / javascript / gulp / git / svg / webp / keyframe-animation / aos
