For the past few years, I have been working on developing my skills and a complex overseas project aimed at automating business processes. I was a front-end developer in a team that included one back-end developer, a team leader, and a UI/UX designer who created the website layout. I was responsible for developing and maintaining the user interface. I used technologies such as HTML, SCSS, JS, Webpack, and AOS animation. We successfully completed the project due to clear communication and team cohesion. My goal is to develop in the direction of front-end development and strengthen my skills in the technologies used in this area.

PROFESSIONAL EXPERIENCE

Online Course SPA [Freelance project], Live Demo [↗](#)

Tech skill: html / scss / javascript / vue / vuex / webpack / git / npm

The site is adapted for different devices.

Github [↗](#)

February 2023 –
April 2023
Usa

Website of the ToDoIt Service [Freelance], Live Demo [↗](#)

We created a user-friendly interface with animation, and a fast website response, not overloaded with residual technologies.

Tech skill: html / scss / javascript / gulp / git / svg / webp / keyframe-animation / aos
